

COVID-19 Outbreak Management Plan

Children's Nursery

Introduction

This plan is based on the contingency framework for managing local outbreaks of COVID-19, provided by the Department for Education (DfE).

We implement measures in the plan in response to recommendations provided by our local authority (LA), the director of public health (DPH), Public Health England (PHE) our local health protection teams or by following Government guidance.

These measures will be implemented to help prevent the spread of infection within the nursery settings, to manage a COVID-19 outbreak or cluster, to react to high COVID-19 infection rates in the community or when all measures in place are still failing to reduce risk and infection.

It is important that everyone complies with the latest Government guidance on Coronavirus. Compassionate leadership is at the heart of offering continued nursery care and we will do everything we can do to be honest, open and to communicate with you. There will be a lot of anxieties and we acknowledge that it is okay to feel worried and that COVID-19 and the lockdown has had an impact on everyone. Everyone involved in the day to day running of the nurseries will have received appropriate instruction and training on how to operate safely.

Measures to prevent the spread of infection

Since the start of the coronavirus pandemic, we have been pleased with our Safe Operating Procedures and the adaptations we have made to our everyday practice to ensure we offered, and continue to offer, our children and staff a safe environment. Hygiene and social distancing remain the two key elements of infection prevention and control. We have made the decision to keep the following procedures in place

*Any child, staff member, parent/carer or visitor with coronavirus symptoms must not attend nursery and must isolate at home.

*Children will not be accepted into nursery if they have been given fever reducing medication, at parent's discretion, after 04:00am on the day of their session (after 09:30am for children with afternoon bookings).

*Any person displaying symptoms must not return to nursery until they have completed the required isolation period and/or received a negative PCR coronavirus test, in line with Government guidelines. Children with temperatures cannot return until they are fever free, without the need of medication to assist, in line with PH DfE guidelines.

*Increased cleaning processes remain in place.

- Team members continue to socially distance from each other and during parent/carer hand-overs.
- Staff members may wear face coverings (if required). Staff members are encouraged to wear face covering when in communal areas.
- Staff members carry out regular (twice weekly) Lateral Flow Device testing and report results to the nursery.
- Ventilation is a key part of infection control, doors and windows remain open and outdoor play is encouraged.
- All persons travelling outside of the UK must adhere to instructions and testing in line with Government guidance.

Management of an Outbreak of COVID-19 in a nursery setting

When the nursery infection cases of children or staff members reach 10% in a nursery setting over a 14 day period this may be referred to as a COVID-19 outbreak.

The Lawns Children's Nursery will take further advice from PHE. Actions may be:

- *A more intense deep clean (the nurseries have fogging machines)
- *Restrictions of people entering the nursery buildings
- *Partial closure of areas in the nursery
- *Isolation of identified children or staff members
- *Investigation by the LA Health Protection Team

Management of a Cluster in a nursery setting

When there are increased nursery infection cases of children or staff members that are concentrated in one class at a nursery setting over a 14-day period this may be referred to as a COVID-19 cluster. The Lawns Children's Nursery will take further advice from PHE. The actions we will take are:

- *Look at the possible need to close the class
- *As current guidance does not request that nursery settings isolate and close classes, we are requesting all staff members connected with a positive case to take daily Lateral Flow tests for 10 days

*Any person contacted by NHS Track and Trace must isolate in accordance with Government guidance

*The Lawns Children's Nursery ensure legal ratios continue to be met

*There will remain a Safeguarding Lead (on call), Paediatric First Aider and a Named Manager/ Deputy at all times

Reaction to high infection rates in the local community

The Lawns Children's Nurseries ensure that they are up to date with infection records in each county area in which they have nurseries. If contacted by DsPH or the LA regarding a high level of infection in the local community the following actions may be recommended:

*Trips and outings in the area are limited or stopped completely for all children

*Events and social days at the nursery are cancelled

*Visitors are not permitted onto the nursery site unless essential to a child's development or well being or to manage an essential need (i.e.. Site maintenance). Any visitors that are permitted on site must wear full PPE and give their details to allow The Lawns Children's Nursery to manage contact tracing if needed.

Actions following high levels of risk and infection

Attendance restrictions will only be used as a last resort. Our requests would be presented in the following order:

*If you are able to keep your child at home to please do so

*Only vulnerable children and those whose parents are critical workers may attend

*Only vulnerable children and those with both parents as critical workers may attend

The Lawns Children's Nurseries wish to remain transparent in all proposed actions and advice that we receive from any of the above mentioned professionals. We thank you for adhering to our Safe Operating Procedures and Risk Assessments and for taking the time to read this Outbreak Management Plan.
